

Dimdim Web Conferencing

The world's easiest web conference

"Dimdim is a next-generation service that is most succinctly described as WebEx 2.0."

- Forbes

"Dimdim worked so well in my tests that I can't imagine paying for a service like WebEx again."

- PCWorld

"Challenging big, entrenched, expensive products with new, leaner products and much more palatable pricing models."

- WebWare

"Big company? Cut your Webex bills by 50% or more..."

- ReadWriteWeb

"...solutions that remain islands, developed and deployed by one company, are much less interesting than open-source solutions that are developed and deployed by a community."

- CNet

Dimdim - the world's easiest web conference - empowers anyone to deliver synchronized live presentations, whiteboards and web pages and share their voice and video over the Internet - **with no download required**. Dimdim is 100% browser-based and is *your* easy, open and affordable web conferencing solution.

Incredibly Easy. Dimdim sports a very simple user interface so you can focus on your meetings - not on technology. And unlike Webex the people you invite to your meeting do not have to install anything - even to broadcast audio or video. A single click starts your meetings - instantly.

Totally Open. You can download our open source version, extend Dimdim via its open APIs and choose powerful hosted or onsite versions to suit your needs. All this is included for free.

Unbelievably Affordable. Dimdim Pro and Dimdim Enterprise provide the same features as Webex at a fraction of the cost. Or try Dimdim Free first to experience the ease and freedom of Dimdim meetings with up to 20 people.

Amazingly Flexible. Dimdim is available in commercial enterprise editions capable of supporting thousands of attendees. You can choose onsite (you install it on your servers) and hosted (we install it on ours) configurations. And only Dimdim is available under a GPL open source license.

We Stand Behind It. Dimdim comes with free lifetime technical support, free professional and integration services. You get free upgrades and no hidden fees.

Try before you buy.

As part of our Managed Evaluation Program you can experience the product more closely. We can help you set up Dimdim Server on your network or enable a fully hosted version for you to try.

Now with SynchroLive! Experience the power of navigating synchronized live web pages on the most robust collaboration network available.

This changes things. With Dimdim, people and organizations everywhere who could never afford (or figure out how) to get together online can now meet freely.

Why is Dimdim Better than Webex?

Dimdim is easier, more open, and more affordable than Webex. With Dimdim, attendees do not need to install any software to join a meeting and most Dimdim meetings are well under way before a typical Webex meeting even gets started. Dimdim is available as open source so it can be extended and integrated with other Web-based solutions including your own website. Finally, as these following charts demonstrate, Dimdim is much more affordable than Webex. So try Dimdim today.

	dimdim	webex™
1 user	\$228	n/a
5 users	\$1140	\$4,500
50 users	\$11,400	\$45,000

Dimdim will save you over \$30K to host meetings with up to 50 participants in one year.*

	dimdim	webex™
1 year	\$11.4K	\$90K
3 years	\$34.2K	\$270K
5 years	\$57K	\$450K

Dimdim will save nearly \$400K for 50 users to host web meetings for 50 participants over 5 years*.
